ISIN Code: GB00B1V7NB85 (Currency: GBP)

Objectives and investment policy

Objective

The investment objective of the Fund is to achieve capital growth (an increase in the value of the Fund) after all costs and charges have been taken, over any five year period. There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest indirectly (via collective investment schemes) at least 90% of the scheme property by value worldwide (including emerging markets) in equities.

The Fund will invest at least 40% of its scheme property by value in UK companies (companies that are incorporated or domiciled in the UK) and UK listed equities. The Fund may also invest directly up to 10% of the scheme property by value in money market instruments, deposits and cash.

The Fund can invest across different industry sectors and market capitalisations without limitation.

The collective investment schemes that the Fund may invest in can include instruments managed or advised by the Manager or the Investment Manager or their associates.

The minimum investment amounts referenced above will not apply under extraordinary market conditions, in which circumstances the Fund may invest in asset classes other than those in which it normally invests in order to mitigate its exposure to market risk. Examples of extraordinary market conditions include economic, political unrest or instability, world events leading to market instability or any events which give rise to high downside risk. During such periods, the Fund may temporarily invest up to 100% of its total assets in cash, deposits, treasury bills, government bonds or short-term money market instruments.

Risk and reward profile

The calculation of the risk and reward indicator is based on 5 years of historical (actual or simulated) information so may not be a reliable indication of the future risk profile of the Fund.

The risk and rewards indicator of the Fund is not guaranteed and may change over time.

The risk and reward profile is classified by the level of historical fluctuation (i.e. volatility) of the Net Asset Values of the Class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

A category 1 fund is not a risk-free investment – the risk of losing your money is small, but the chances of making gains is also limited.

The risk category does not take into account the following material risks:

Counterparty Risk: The Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the Fund.

Currency Risk: Even with the use of hedging techniques, changes in currency exchange rates could adversely affect the Fund's performance.

Default Risk: The issuers of certain bonds could become unable to make payments on their bonds.

Liquidity Risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Management Risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.

Emerging Markets Risk: The Fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, which may result in large and frequent price movements that may cause a loss to the Fund.

For full details of all the risks that could affect the Fund, please refer to the Prospectus.
