

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## The Edenbeg Fund (the "Fund")

**Share Class: Net Income Shares (the "Class")**

**ISIN Code: GB00B51KCC93 (Currency: GBP)**

**Authorised Corporate Director (ACD): Yealand Fund Services Limited**

### Objectives and investment policy

#### Objective

The investment objective of the Fund is to generate a combination of capital growth and income, with a target to achieve returns in excess of the United Kingdom Consumer Prices Index ("CPI")+ 4% (net of fees) on an annualised basis over rolling 10 year periods. There is no guarantee this will be achieved over this, or any other, time period and capital is at risk.

#### Investment Policy

The Fund will seek to achieve its objective by investing, directly or indirectly, in global equities and corporate or government bonds. The Fund may also invest in alternative assets which may include funds that use absolute return strategies (meaning a fund that seeks to make positive returns by employing investment management techniques that differ from traditional funds) or funds that invest directly in real estate, or indirectly in gold and/or commodities. The fund may also invest in warrants, money market instruments, cash, near cash and deposits. The range for each asset class is set out in the table below.

Indirect exposure may be achieved by investing in regulated and unregulated Collective Investment Schemes ("CIS"), exchange traded funds, or investment trusts, including those managed by the ACD, the Portfolio Managers or their associates. The Fund may have exposure to passive funds of up to 40%. The range for each asset class is set out below.

#### Asset Class Ranges

- Equity - 45% to 100%
- Debt - 0% to 50%
- Alternatives - 0% to 25%
- Cash - 0% to 20%

The asset allocation may be moved towards the bottom or the top of the above ranges depending on the Portfolio Managers views on optimum asset allocation as well as in responding and managing macroeconomic conditions (such as e.g. fiscal, natural, or geopolitical event that broadly affects a regional or national economy) and difficult market conditions (meaning volatile markets following an event, such as the financial crisis 2008).

The Fund adopts a flexible investment strategy and can invest in any sector and in any geographic area, subject to the asset ranges set out in the table above. The Portfolio Managers have full flexibility to adjust the proportion of the scheme property of the Fund depending on their view of market conditions and the assets which they believe are most likely to achieve the Fund's investment objective. The Fund may enter into derivatives and forward transactions for the purposes of efficient portfolio management (including hedging). The use of derivatives is expected to be limited.

A Glossary of Definitions which provides definitions to some of the technical language used in this document is available from [www.yealand.com/policies](http://www.yealand.com/policies).

#### Recommendation

This Fund may not be appropriate for investors who plan to withdraw their money within 10 years.

#### Benchmark

The Fund is actively managed and is not managed in reference to a benchmark, however it has a performance target benchmark of the United Kingdom Consumer Prices Index All Items plus 4% (the "Benchmark").

#### Dealing

Shares in the Fund may be bought or sold before 10am on any business Tuesday.

#### Income

Income of the Class will be paid out as a dividend on a biannual basis.

### Risk and reward profile

The calculation of the risk and reward indicator is based on 5 years of historical (actual or simulated) information so may not be a reliable indication of the future risk profile of the Fund.

The risk and rewards indicator of the Fund is not guaranteed and may change over time.

The risk and reward profile is classified by the level of historical fluctuation (i.e. volatility) of the Net Asset Values of the Class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

A category 1 fund is not a risk-free investment – the risk of losing your money is small, but the chances of making gains is also limited.

The risk category does not take into account the following material risks:

**Counterparty Risk:** The Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the Fund.

**Currency Risk:** Even with the use of hedging techniques, changes in currency exchange rates could adversely affect the Fund's performance.

**Default Risk:** The issuers of certain bonds could become unable to make payments on their bonds.

**Liquidity Risk:** During difficult market conditions, some securities may become hard to value or sell at a desired price.

**Management Risk:** Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.

**Risks of Derivative Investments:** The use of derivatives may involve additional risks for shareholders. The Company may enter into derivative and forward transactions. As a result, the NAV of the Company could potentially be more volatile, however, it is the intention that the Company, owing to its asset composition and the portfolio management techniques used, will not have volatility materially over and above the general market volatility of its underlying investments. The use of derivatives is not intended to increase the risk profile of the Company.

For full details of all the risks that could affect the Fund, please refer to the Prospectus.

Charges for this fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge	5.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested (entry charge) or before the proceeds of your investment are paid out (exit charge).

Charges taken from the Fund over the year

Ongoing Charges	1.07%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance Fee	None
-----------------	------

The entry and exit charges shown are maximum figures. In some cases you may pay less – you can find this out from your financial advisor.

The Ongoing charges figure is based on expenses as at 28 February 2025 and this figure may vary.

It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective undertaking.

The ACD receives an annual fee, which is included in the ongoing charges shown here. Ongoing Charges are the same for all investors in the class.

For more information about charges, please see the “Charges” section in the Fund’s Prospectus which is available from the ACD.

Past performance

Total Return %

The Edenbeg Fund was launched on 02 June 2009, and the Class launched on 02 June 2009.

This chart shows how much the Fund increased or decreased in value as a percentage for 10 full consecutive years or for each year since the launch of the Fund if it has not been in existence for 10 years.

Performance has been calculated in GBP and takes account of ongoing charges.

Past performance is not a guide to future performance; the value of your investment and any income from it may go down as well as up.

The Fund's benchmark is only in place since December 2024 and accordingly is not displayed in the performance graph.
