

This document provides you with the key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Chandos Fund (the “Fund”)

(Sub-Fund of Spectra 2 Investment Funds (NURS))

Share Class: Income Shares (the “Class”)

ISIN Code: GB00BSLLBJ34 (Currency: GBP)

Authorised Corporate Director (ACD): Yealand Fund Services Limited

Objectives and investment policy

Objective

The investment objective of the Fund is to preserve and grow the real (i.e. after inflation) value of the Shares of the Fund, net of fees, by the UK Consumer Price Index (“CPI”) plus 3% per annum, over a seven year rolling period. There is no guarantee this objective will be achieved over this, or any other, time period and capital is at risk.

Investment Policy

The Fund adopts a flexible investment strategy and can be invested in any sector and in any geographic area. Subject to the asset ranges specified below, the Portfolio Managers have full flexibility to adjust the proportion of the scheme property of the Fund depending on their view of market conditions and the assets which they believe are most likely to achieve the Fund's investment objective.

The Fund's investment policy is to invest between 50% to 100% of the assets either directly or indirectly in global equities and equity related securities. The equity allocation may be moved towards the bottom or the top of the range depending on the Portfolio Managers views on optimum asset allocation as well as in responding and managing macroeconomic conditions (such as e.g. fiscal, natural, or geopolitical event that broadly affects a regional or national economy) and difficult market conditions (meaning volatile markets following an event, such as the financial crisis 2008). Up to 40% of the Fund's assets will be invested in corporate or government debt securities (directly or indirectly). The bond allocation may be pushed towards the top of the range depending on the Portfolio Managers views on optimum asset allocation as well as in responding and managing macroeconomic conditions and difficult market conditions.

The Fund may have exposure of up to 35% in alternative assets which may include funds that use absolute return strategies (meaning a fund that seeks to make positive returns by employing investment management techniques that differ from traditional funds) or funds that invest directly in real estate, or indirectly in gold or other commodities. The Fund may gain exposure to alternative assets via permitted instruments such as collective investment vehicles. The Fund may also invest in warrants, money market instruments, cash, near cash and deposits.

A summary of the approx. allocation of the Fund's assets that will be invested in each of the asset classes is set out below.

Asset Class Ranges

- Equity - 50% to 100%
- Debt - 0% to - 40%
- Alternatives - 0% to 35%

The Fund may invest indirectly in (regulated and unregulated) Collective Investment Schemes (“CIS”), exchange traded funds, investment trusts or structured products (products offering a fixed-term predefined return linked to the performance of a range of assets or indices), typically which have exposure to equities and debt securities but which may also have different investment strategies or restrictions to the Fund, including the ability to invest in derivatives for investment purposes. The Fund may invest in CIS which are managed by the ACD, the Portfolio Managers or their associates. The Fund may enter into derivatives and forward transactions for the purposes of efficient portfolio management (including hedging). The use of derivatives is expected to be limited. The Portfolio Managers will actively manage the Fund. This means the Portfolio Managers actively make decisions about how to invest the scheme property (and which investments to buy and sell) instead of simply following a market index. A Glossary of Definitions which provides definitions to some of the technical language used in this document is available from www.yealand.com/policies.

Recommendation

This Fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Benchmark

The Fund is actively managed and is not managed in reference to a benchmark

Dealing

Shares in the Fund may be bought or sold before 10am on any Friday, or if this is not a business day, then the next business day.

Income

Income of the Class will be paid out as a dividend on a biannual basis.

Risk and reward profile

The calculation of the risk and reward indicator is based on 5 years of historical (actual or simulated) information so may not be a reliable indication of the future risk profile of the Fund.

The risk and rewards indicator of the Fund is not guaranteed and may change over time.

The risk and reward profile is classified by the level of historical fluctuation (i.e. volatility) of the Net Asset Values of the Class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

A category 1 fund is not a risk-free investment – the risk of losing your money is small, but the chances of making gains is also limited.

The risk category does not take into account the following material risks:

Counterparty Risk: The Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the Fund.

Currency Risk: Even with the use of hedging techniques, changes in currency exchange rates could adversely affect the Fund's performance.

Default Risk: The issuers of certain bonds could become unable to make payments on their bonds.

Liquidity Risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Management Risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.

For full details of all the risks that could affect the Fund, please refer to the Prospectus.

Charges for this fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) or before the proceeds of your investment are paid out (exit charge).	
Charges taken from the Fund over the year	
Ongoing Charges	1.13%
Charges taken from the Fund under certain specific conditions	
Performance Fee	None

The entry and exit charges shown are maximum figures. In some cases you may pay less – you can find this out from your financial advisor.

The Ongoing charges figure is based on expenses as at 31 December 2024 and this figure may vary.

It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective undertaking.

The ACD receives an annual fee, which is included in the ongoing charges shown here. Ongoing Charges are the same for all investors in the class.

For more information about charges, please see the “Charges” section in the Fund’s Prospectus which is available from the ACD.

Past performance

Total Return %

There is insufficient data to provide a useful indication of past performance to this share class' investors.

Chandos Fund was launched on 25 October 2024, and the Class is currently unlaunched.

This chart shows how much the Fund increased or decreased in value as a percentage for 10 full consecutive years or for each year since the launch of the Fund if it has not been in existence for 10 years.

Performance has been calculated in GBP and takes account of ongoing charges.

Past performance is not a guide to future performance; the value of your investment and any income from it may go down as well as up.
